

WE ARE HIRING!

BIONTO HAS A PLACE FOR YOU. We are looking for an experienced scientist to strengthen our strain developing capabilities of the company's fungal production platform. In this position, you will play an essential role in planning, carrying out, analysing and reporting technology and customer projects together with a highly competent and supportive team. We expect that you have:

- an education (M.Sc./Ph.D.) in Biotechnology or Microbiology, or adjacent field,
- 5+ years of work experience in microbial production platform(s),
- excellent laboratory skills and high competence in genome editing techniques,
- result-focused personality,
- strong collaborative and communication skills,
- fluent written and verbal communication skills in English and, most importantly,
- a can-do attitude with genuine team player skills.

BIONTO. BIONTO provides industrial R&D and manufacturing services covering the entire bioproduct development process from concept to end product. BIONTO's core competence lies in understanding how to anchor a hypersecreting filamentous fungus, *Trichoderma reesei*, for commercial biotechnology purposes. The BIONTO team has a total of 100 years of industrial experience in bioproducts and the competitive advantage that arises from combining several technological areas of expertise: molecular and synthetic biology, precision fermentation, down-stream processing, product formulation and industrial scale-up.

BIONTO raised a EUR 4 million seed round in 2024, welcomed Korpi Capital as a co-owner and recently received R&D and DTA funding of EUR 1.5 million from Business Finland. And this is just the beginning.

OFFER. We offer you:

- an industrial, high competence employment opportunity to learn and promote,
- a permanent position with competitive compensation,
- a trustful and supportive organization culture and, of course
- a fast-growing, green and bright future with us.

NEXT STEPS. Please send your CV and application letter by 16.3.2025 at the latest to recruitment@bionto.fi. For further information, please contact us by email.
